

## **Use of Spares for League Games**

Teams are required to use the Spares List when needing a replacement player for a league game. Ideally, the Skip will call for a spare. Members are to be called first and will be identified on the list with an “M” adjacent to their name. Once members on the list have been exhausted, anyone else on the list, such as a Pay as you Play player may be called. If efforts fail to obtain a spare from the spares list, skips may utilize anyone of their choosing.

Spares may be utilized to fill the position of the player they are replacing or the lead position. Keeping in mind that in mixed league, positions must alternate male/female.

A team is permitted to use a maximum of two spares for any scheduled game. If more than two spares is required, the game may still be played, however, the game must be forfeited to the opposing team, in the win column.
